Sage Made Simple in Your Browser

Say goodbye to the complexity of Citrix Workspace and cumbersome VPNs. myCREcloud offers a simpler, faster, and more intuitive way to access **Sage 100 Contractor, Sage 300 CRE, Sage Estimating and Sage Paperless** right from your browser.

Why switch to the browser?

Effortless Access

No more logging into Citrix or navigating a virtual desktop. Launch Sage just like you would your favorite website or app — it's that easy.

Streamlined Printing

Tired of printer issues? With myCREcloud, Sage uses your browser's native print settings. That means no redirection, no delays, and no confusion.
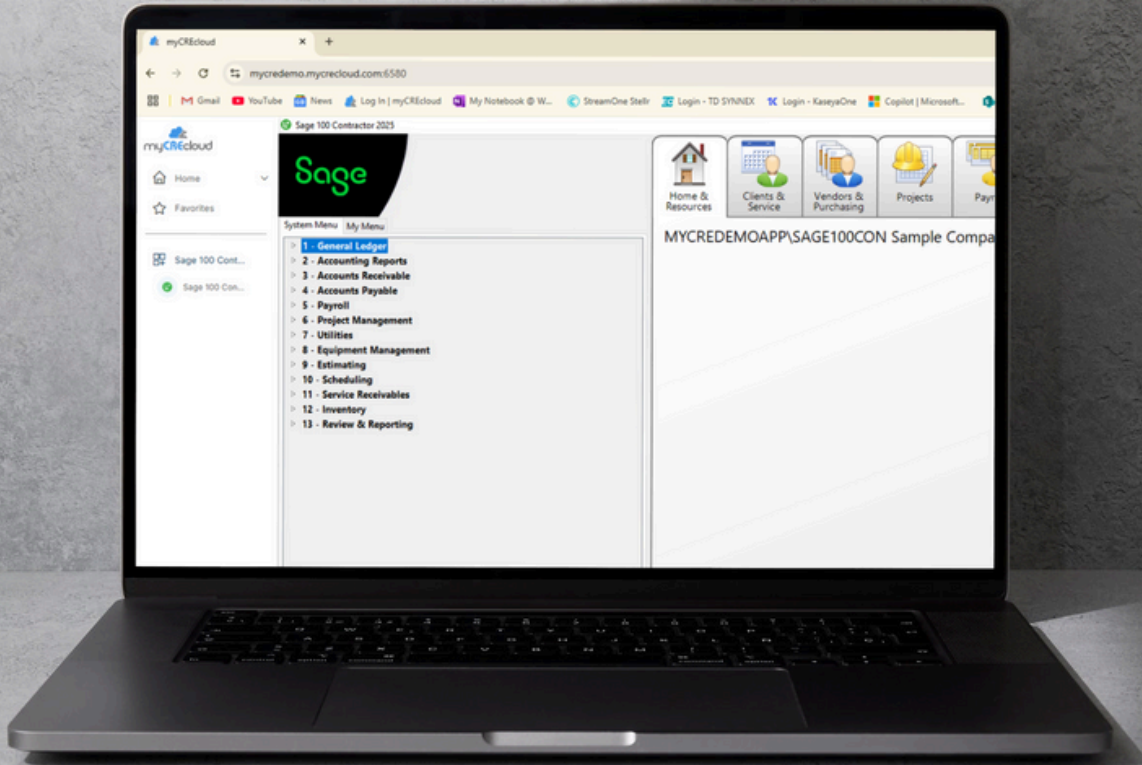

Easy File Access

Accessing local files should be simple and with us, it is. Our platform makes it easy to open and work with files from your local device while using Sage in the cloud.

Third-Party App Integrations

We support seamless integrations with your favorite third-party apps, ensuring your Sage system works smoothly with the tools you rely on—no extra hassle.

Desktop App Simplicity

Prefer the classic feel? Our lightweight cloud app sits right on your desktop. Just double-click, log in, and you're in — no extra steps or confusing menus.

Browser-Based Freedom

On the go? Use any modern browser — Chrome, Firefox, Safari, or Edge — to launch your Sage application. No software to install, no browser extensions to manage. Just click and go.

Nothing to Install

That's right. Browser-based access requires zero client-side installs. If your device has a browser, you're ready to work.

Faster, Smoother Performance

By eliminating plugins and third-party software, our browser-based Sage experience is faster and more reliable — with quicker load times and fewer hiccups.

Full-Service Support

We provide Sage cloud users with US-based support from Sage experts. From seamless onboarding and cloud hosting to technical assistance, our team ensures your Sage applications are up and running smoothly.
